# Legionella Awareness Training

## WHAT?

### What is the training about?

This course provides training on Legionella Awareness. Commonly found in natural water sources such as rivers, lakes and reservoirs, Legionella bacteria can also be found in purpose-built, manmade water systems such as cooling towers, evaporative condensers, hot and cold water systems and spa pools.

## WHY?

### Why do I need it?

As a person responsible for management, control or monitoring the risk of exposure to Legionnaire's bacteria, it is important to be equipped with the confidence to recognise the presence of Legionella bacteria in their water systems, as well as any associated health symptoms from Legionnaire's disease.

## WHERE?

### Where can I do the training?

As an online course, which takes around forty minutes to complete, this course offers the flexibility of completion at home or in the work place.
