

SOCOTEC UPDATES MIPORTAL SOFTWARE

We are the UK's leading provider of testing, inspection and certification services, has announced a series of updates to its MiPortal software, due to take place between 23 to 27 May.

MiPortal provides organisations with a comprehensive and independent compliance solution, allowing customers to take real-time information from a wide range of sources and combine it into one centralised management system. Accessible from any device, anywhere and at any time, functions of MiPortal include:

- > Documents
- Events and planner
- > Task manager
- Incidents
- COSHH
- Monitoring (Legionella management)
- Asbestos register
- > Interactive floorplans
- > Analysis results
- Samples module and mobile sampling app
- > Dashboards.

This series of updates will form the first stage of the MiPortal modernisation process. The interface is now more user-friendly, easier to navigate and embodies a more modernised look and feel. The responsive element of MiPortal on mobiles has also improved significantly, particularly in terms of its overall visibility and aesthetic.

"As we continue to update our MiPortal software, our customers can expect the same high standard of service, but with a more updated look and feel," said Nicolas Detchepare, CEO, SOCOTEC UK. "These latest updates are part of a bid to bring the MiPortal platform back to life, while continuing to develop and enhance its range of features.

"We look forward to receiving feedback from our customers regarding these updates, and we are confident that these developments are representative of our ongoing commitment to innovation and excellence."
